Allowable Subject Matter

1. Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach that, the fluorescent lamp is divided to a positive phase fluorescent lamp and an inverted phase fluorescent lamp, the positive phase fluorescent lamp outputting a current signal and the negative phase fluorescent lamp outputting a second current signal, the first current signal being at the positive half cycle while the second current signal being at the negative half cycle, the signal processor processing the first current at the positive half cycle and generating a current compensation signal to the high frequency pulse modulator which outputs a resonant frequency to control the current variation of the fluorescent lamp; the first current signal being at the negative half cycle while the second current signal being at the positive half cycle, and the signal processor processing the second current signal at the positive half cycle and generating another current compensation signal to the high frequency pulse modulator which outputs another resonant frequency to control the current variation of the fluorescent lamps recited in independent claim 1. (claims 2-7 are allowed since they are dependent on claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Vaughn (US 6,016,052) and Lin et al. (US 6,380,695) are cited

to show a pulse frequency modulation drive circuit for fluorescent lamp.
